### Program Goal

As a result of this course, participants should feel comfortable with the use of bedside ultrasound for diagnosis of emergent pathology and in guidance of bedside procedures

### Educational Objectives

At the conclusion of this CME activity, the participant should be able to:

1. Discuss the practical clinical use of focused bedside ultrasound in patient care.
2. Identify normal sonographic anatomy as well as pathology identified on bedside ultrasound.
3. Use bedside ultrasound to guide common Emergency Department and ICU procedures such as placement of central venous catheter, peripheral venous catheter, thoracentesis, paracentesis and lumbar puncture.
4. Identify clinical scenarios where bedside ultrasound may be used to improve patient care and patient outcomes.
