Program Goal

As a result of this course, participants should feel comfortable with the use of bedside ultrasound for diagnosis of emergent pathology and in guidance of bedside procedures

Educational Objectives

At the conclusion of this CME activity, the participant should be able to:

1. Discuss the practical clinical use of ultrasound in patient care
2. Identify normal anatomy as well as pathology such as pericardial effusion, hemoperitoneum, and pneumothorax
3. Guide bedside procedures such as IV access and others

Target Audience

Emergency and Critical Care physicians and PAs

Renowned Faculty

Our faculty have lectured nationally and internationally and have extensive experience in teaching ultrasound to physicians of all levels

“Superior presentation. Speakers were excellent.”

Live models and hands-on sessions

Didactic sessions are reinforced with ample time for scanning on live models, questions and answers, and practicing procedural techniques on simulators

“Hands-on training greatly improved my confidence and abilities.”

This activity has been approved for 8 AMA PRA
